

**Article Title** [Title case, Times New Roman 11 point, Bold, Italic, Centre aligned]

**First Author<sup>1</sup>, Second Author<sup>2</sup>** [Times New Roman 11 point]

<sup>1</sup>Department of Management, University of Philadelphia (firstauthor@email.edu.my)

<sup>2</sup>Department of Accounting, National University (secondauthor@email.edu.my)

**ABSTRACT.** An abstract between 250 to 350 words should appear on the top of the first page, after the title of the paper in a section titled "ABSTRACT", after the names of the authors. Abstract should use 10-point Times New Roman font with justified alignment. The abstract should state briefly the purpose of the research, methods, main findings and conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. Non-standard or uncommon abbreviations should be avoided. A list of keywords (maximum of five) must be included after the text of the abstract.

**Keywords:** [4-5 keywords; capitalize each word; separated by semi colon]

## 1 INTRODUCTION

In this document, the formatting requirements for *JARIMS* are described. Some recommendations on writing for a worldwide readership are offered. Please review this document and the guidelines to learn about the formatting of text, table captions, references, and the method to include the indexing information. All papers and posters will undergo a blind peer review process. It is expected that authors will submit carefully written and proofread materials. Careful checking for spelling and grammatical errors should be performed.

Papers should clearly describe the background of the subject, the authors work, including the methods used, results and concluding discussion on the importance of the work. Technical terms should be explained. Acronyms should be written out at their first appearance. Do not use acronyms in the title or heads unless they are unavoidable.

## 2 PAPER FORMAT

The uniform appearance will assist the reader to read paper. It is therefore suggested to authors to use the example of this file to construct their papers.

### 2.1 Tables and Figures

Figure captions and table headings should be sufficient to explain the figure or table without needing to refer to the text. Figures and tables not cited in the text should not be presented. The following is an example for Table 1.

Table 1: Title of the Table

Type of nanoparticles	Average size (nm)	Variance (nm)
FAGE	47	4.2
LEVE	35	6.4
MNOV	42	2.1
INTC	27	3.9

Tables and figures should be placed close after their first reference in the text. All figures and tables should be numbered and table headings should be aligned left above the tables. Figure captions should be centred below the figures as shown in Figure 1.
